

Parts of a Combine

1. Reel — taps the head of the grain forward before it is cut.
2. Cutting Bar — cuts the grain stalk.
3. Feeder Beater — where the separation of grain and straw begins.
4. Rasp Bar Cylinder — where the final separation takes place.
5. Undershot Fan — cleans the grain of fine straw particles.
6. Grain Auger.
7. Elevator to grain tank.
8. Grain Hopper — grain is temporarily stored here.
9. Grain hopper unloading auger.
10. The straw is moved out by the Straw Walkers.
11. Straw is tossed out of machine by Straw Spreader.
