

## Connect the dots to Meet the Piper Cub!

Full name: Piper J-3 Cub

Colour: Yellow

The Piper Cub is small, light airplane that was especially popular in northern Saskatchewan.

Did you notice that the Piper Cub has no wheels? Instead, it has “floats” so that it can land on water. Sometimes fishermen flew it to northern lakes they couldn’t get to by road. Piper Cub airplanes were made from 1938-1947.
